

March 26, 1975

live, and so that is the reason I am familiar with them. You notice from the police report the car did come over a hill, which was involved, a kind of a crest of a hill situation which I have pointed out. Now I see we all got telegrams this morning from the Nebraska Council of Sportsmen Club in which they say the right to shoot from roadside has not created any additional law enforcement problems according to the Games and Parks Commission, which is probably true, but accident reports are not filed with the Games and Parks Commission. I was amazed, as a matter of fact, that they come in and obviously generated the opposition that they apparently attempted to do. I would respectfully request that 30 members will vote to place LB 113 on General File so that it can be discussed and this hazardous traffic condition can be changed. One other remark, as you read the Committee report and I assume there will be those who will attempt to enter into this issue other controversial issues, which while they may be related, they are not a part of the issue involved in 113 and, specifically, I am talking about the hunting of coyotes and this bill does not affect that. It is a separate issue. If there are those who have concern about that, obviously, they could have a bill introduced to address itself to that issue. I would plead with the body to place this bill on General File and I am doing it on behalf of many of the constituents that I represent who have had near accidents and in one case, a fatality.

PRESIDENT: Senator Cope.

SENATOR COPE: Mr. President, fellow members, I am in support of the Warner request to place LB 113 on General File. I am a member of the Recreation Committee that heard this bill and I voted then to put it on General File. We lost. I did this because of personal calls and of mail from farmers and ranchers. Now the farmer-hunter relationship was strained, I think, before this bill was enacted and I don't think it has improved one bit. I really sincerely believe after talking to farmers and ranchers that it is more strained at the present time so I would ask you to support the Warner amendment.

PRESIDENT: Senator Syas.

SENATOR SYAS: How many are there that have lights on. I am it?

PRESIDENT: You were it.

SENATOR SYAS: Oh, I were it. Now what's happened?

PRESIDENT: Well, is this confidential information. No, there are two other Senators now. There were none when you stood up. You usually generate some lights, George.

SENATOR SYAS: Well, I figured, Mr. President, that I would be the only one that would stand here and oppose raising this bill. Therefore, since the proponent gets the right of close, I figure that I'd let all the persons on the other side talk first, naturally, but I guess I am not going to be given that opportunity. But anyhow, I oppose
